

**Illinois Institute of Technology** (Illinois Tech) invites applications for a tenure-track Assistant Professor position in either **Industrial and Organizational Psychology** or **Clinical Psychology**, to begin August, 2019. The I-O specialization requires a PhD in I-O psychology, quantitative psychology, measurement or a related field, while the clinical specialization requires a Ph.D. from an APA- or CPA-accredited clinical psychology program. Faculty activities include establishing an independent research program, research mentoring, and teaching at the graduate and undergraduate levels. We are seeking applicants with a strong record of research productivity. In addition to contributing to the I-O or Clinical programs, we especially encourage applicants whose work fits the broader mission of the department and University, including candidates who specialize in an area of scholarship that leverages technology or has implications for technology, or who have an interest in developing relationships with underserved and low SES communities in the Chicago area.

**I-O Psychology Program:** The I-O Program at Illinois Tech is dedicated to a scientist-practitioner model with a balance of research and practice. Current areas of I-O program strength include methodology, selection, training, leadership, occupational health psychology, humanitarian work psychology, diversity and cross-cultural research. An ideal candidate will complement and strengthen the current areas of expertise in the program, with preference for research and teaching interests in methodology, big data and analytics, or group dynamics and technology.

**Clinical Psychology Program:** The APA-accredited Clinical Psychology Program at Illinois Tech is dedicated to a scientist-practitioner model, with a balance of research and practice and a cognitive-behavioral focus. We are seeking applicants with a strong record of research productivity and the potential to secure external funding. The research emphasis is open, but we are particularly interested in the areas of neuropsychology, addiction science, trauma, mood disorders, aging, and health psychology.

The Department of Psychology has three scientist-practitioner graduate programs, in Clinical Psychology, I-O Psychology, and Rehabilitation and Mental Health Counseling, as well as a growing undergraduate program. Faculty and students work in a collaborative atmosphere both within and between programs. Many faculty collaborate with the Center for Research and Service, an on-site consulting center that supports training, funding, and research efforts of students and faculty and draws on our close affiliations with organizations in the city and suburbs. More information on the I-O and Clinical programs and the Department of Psychology can be found at <http://www.iit.edu/psych/>. Illinois Institute of Technology is located in the vibrant city of Chicago with wide range of opportunities for research and consulting.

The Department of Psychology is committed to promoting a climate that enhances diversity and inclusion, and also to achieving diversity in its faculty. We are particularly interested in applications from qualified applicants who could contribute to the diversity of our department.

A letter of interest (including statements regarding research and teaching), curriculum vitae, selected publications, and three letters of recommendation should be sent to [iitpsych\\_search\\_group@iit.edu](mailto:iitpsych_search_group@iit.edu) (or alternatively I-O/Clinical Search Committee, 3424 South State Street, Tech Central Room 201, Chicago, IL 60616). For questions regarding the position, contact Dr. Frank Lane [lane@iit.edu](mailto:lane@iit.edu) or 312-567-8862. Review of candidates will begin immediately and continue until the position is filled. Illinois Institute of Technology is an EEO/AA/Title VI/Title IX/Section 504/ADA/ADEA employer committed to enhancing equity, inclusion and diversity within its community. It actively seeks applications from all individuals regardless of race, color, sex, marital status, religion, creed, national origin, disability, age, military or veteran status, sexual orientation, and/or gender identity and expression. All qualified applicants will receive equal consideration for employment.
